

COMPANY PROFILE

**Advance
Scaffolding
Limited**

ABOUT US

Incorporated in 2008 Advance Scaffolding Limited (ASL) has grown to become one of the leading supplier in scaffolding services with in the Caribbean. With comprehensive knowledge in Scaffolding design and the erection and dismantling of scaffolding structures across the region ASL is fully capable of meeting the needs of the construction industry, petrochemical industry, service and maintenance companies, residential and commercial sectors.

With over 150 full time scaffolders who are all trained and hold scaffolding qualifications we are fully committed to the health and safety scheme. ASL has an in house maintenance team keeping all working materials fully serviced and in tip top condition at all times . Our extensive portfolio of equipment enables us to respond to the needs of any situation within a very demanding sector. We also operate a large fleet of vehicles giving us all the logistical means to transport our equipment safely and efficiently. we are committed to offering a 24hour, 7 days a week service.

Speciality Services:

- Rental and Rigging of scaffolding
- H Frames Scaffolding
- Access stairs
- Catwalks
- Guardrails
- Shoring
- Stages
- Swing stage
- Bleachers
- Construction fencing
- Trussing
- All types of ladders and Scaffolding Accessories

Cup Lock Scaffolding

Our cup lock standards and ledgers are made only from the highest quality 48.6mm diameter tube and are hot dip galvanized making them long lasting and durable. Cup lock systems are versatile scaffolding systems that are used for various forms of access and support structures in building and construction industries.

Our experienced engineering team can assist with the design of both interior and exterior solutions for all types of construction projects, shoring design and complex industrial applications.

We are renowned for our reliability and safety, and complies with ISO standards all of which makes us one of the leading scaffolding suppliers in the country.

Cup Lock Scaffolding

Why Choose Cuplock ?

The Cuplock system is the safest option. Cup lock is a unique node point connection allows up to four horizontal members to be connected to a vertical members in one single action - without the use of nuts and bolts or wedges. The locking device is formed by two cups. Single node point action of unique locking make 'cuplock/Cuplock' a fast, versatile and optimized system of scaffolding for scaffolding for construction, demolition and maintenance projects. With our 42 000 sq ft of warehouse space, makes us the largest supplier of scaffolding in the region.

Silent Features:

- Cuplock system - Easy to STAND - say no to nuts and bolts or wedges
- Just a simple locking cup at each node point on the standards enables connection of the ends of up to four members in one locking action
- Cuplock systems- Versatile!
- Best suitable for access or formwork support.
- Cuplock systems- Timely tested and Proven design with safety accessories
- Cuplock System has a proven performance history on an extensive number of sites, meeting the requirements of the various statutory bodies.
- Quick fastening of horizontals. Only 4 horizontals can be fastened at one time with firm clamping action of top cup making the joint rigid.
- Quick/Fast/Solid erection and dismantling results in time and labour saving.
- Widely and Versatile use in construction, demolition or maintenance projects for any type of structure i.e. straight or curved.
- Lightweight but high loads carrying capacity.
- Low maintenance.

We have designed and erected some of the most complicated cup-lock jobs in the country to date. in all sectors from, commercial to industrial to residential projects.

SHORING

Shoring is a general term used in construction to describe the process of supporting a structure in order to prevent collapse so that construction can proceed. In this situation vertical supports are used as a temporary replacement for the building columns or walls.

The ASL team includes design specialists with experience in shoring design for residential and commercial buildings, underground parkades and renovation projects. We guarantee the most cost effective shoring equipment for the job site according to the contractor's specific requirements. A complete inventory of shoring equipment is always ready for delivery to meet any customer's requirements.

Our shoring department specializes in suspended slab support shoring for low rise building as well as flyform tables for high-rises. The shores range between 4'0 up to 18'0". Aluminum beams from 5'0 to 30' in length and 4x6 in lengths from 4'0 to 14'0 are also available.

Everyone's safety depends upon the proper erection and safe use of shoring. Inspect your shoring before each use to see the assembly has not been altered and is safe to use.

We inspect all equipment before using. Never use any equipment that is damaged, severely rusted or is missing locking devices. Any component which cannot be brought into proper alignment or contact with the component into on onto which it is intended to fit shall be removed and replaced.

A shoring layout shall be available and used on the jobsite at all times.

Inspect erected shoring and forming for conformity with layout and safety practices prior to pour, and after pour until concrete is set.

TEMPORARY FENCING

Temporary construction fencing is an alternative to its permanent counterpart when a fence is required on a short-term basis when needed for storage, public safety, crowd control, or theft deterrence. Other uses for temporary fencing include venue division at large outdoor events, parking lots and public restriction on industrial construction sites.

Construction fencing consists of individual panels that can be set up around the perimeter of the desired area to be fenced in. With Advance Scaffolding Limited Temporary Construction Fencing we can rapidly secure your property and equipment with ease.

Our temporary fencing is specifically designed to be easily erected whilst providing a strong and secure barrier around your site. It is effective for many purposes, including: domestic, commercial and industrial building, demolition, renovation, extensions, landscaping, enclosures etc. If you require temporary fencing throughout Trinidad and Tobago, you can rely on Advance Scaffolding Limited to secure your site quickly. We keep a large amount of fencing in stock at all times, so you are guaranteed we can meet your demands in a short period of time.

We train all of our qualified installers to make sure your valued site is guarded and that the temporary fencing meet all standards. Our installers also are trained to satisfy all compliance issues and can work with any critical adjustments quickly.

We'll build your fence to be rugged, tough and durable to keep even the most determined intruders out. Our temporary construction fencing is very sturdy and can be supplemented by additional products to ensure the strength and longevity of the barrier.

In order to accommodate our customers' needs, ASL offers multiple options for customized set-ups and removals of temporary fencing rentals. Some construction sites prefer to set-up the fencing themselves. We are happy to provide drop-off and pick-up service only, as well as a pick up from our location should that work best for your site.

SWING STAGE

Swing stage is a suspended platform that allows exterior work on various levels from ground to the roof on majority job sites and interior on some job sites. Run by hoist and steel cables, swing stage is widely used in exterior window washing, painting, restoration and other construction projects.

Advance Scaffolding Limited is a leader in swing stage innovation and one of the largest suppliers of modular platforms, hoist and beams in the country. Our extensive inventory allows many alternatives to suspended platform access solutions. While decades of combined experience let us handle most challenging projects with ease.

With worker safety as a priority, Advance Scaffolding Limited offers a full line of approved fall arrest equipment. In order to meet the changing building code requirement, our swing stage department is constantly upgrading its employee's knowledge and training. With over 40 years of combined employee experience and a commitment to safety and integrity, makes RRL swing stage the company of choice.

BLEACHERS

Bleachers or stands are raised, tiered rows of benches found at sports fields and other spectator events. Stairways access the horizontal rows of seats, often with every other step gaining access to a row of benches. Benches range from simple plank benches to more elaborate benches with backrests. Many bleachers are open to the ground below so that there are only the planks to sit and walk on.

ASL bleachers are designed specifically for the neighborhood athletic fields, show grounds, movie sets, etc.; and provide comfortable yet compact seating for small and large crowds.

We offer two types of bleachers: pre-assembled and universal (has to be assembled).

Bleachers can be arranged to accommodate:

- 3 Rows – 33 persons
- 7 Rows – 77 persons
- 10 Rows – 110 persons
- 15 Rows – 159 persons

Our bleachers can be built to any size based on a 6' wide by 10' deep footprint. These can be built as wide or as deep as one desire.

STAGES

We have numerous outdoor stage systems which are ideal for a wide range of events. All stages come with full structural and wind-loading reports. Whether it is the big savannah stage or a concert stage, erection Advance Scaffolding Limited is the one stop you need to make.

Our range of outdoor stage structures is ideal for events from small concert performances up to major festival stages where space is needed for multiple performer changeovers. Many of our clients have unique requirements, so we will design and provide fully bespoke solutions to meet the needs of site, height or environmental limitations.

WHETHER YOUR EVENT IS INSIDE OR OUTSIDE, WE WILL PUT YOU ON THE PERFECT STAGE.

Your stage will be perfect for your event and we will fulfill all your needs according to your instructions. We are able to provide a huge range of stages for unusual projects and custom builds. Our team of skilled designers and crew have experience building ramps for trucks, circus rigs, multi-tiered stages on steep slopes and many other diverse projects in stage-building.

Our outdoor stage is a small structure and ideal for where structurally-sound, weather-protected structures are required for events. Like all of our structures, it is made from modular components and as such can be built to your specification. .

SAFETY

Humans instinctively seek to avoid pain and death. And yet, we may behave in a manner that is a threat to our well-being. There are a couple of reasons why this occurs. The first is lack of knowledge. What you do not know, can hurt you! The second reason we may act in a risky manner is attitude. Attitude affects behavior. If you have a positive attitude, odds are you will exhibit safe behavior. A negative attitude toward safety will only cause conflict, stress and, ultimately, an accident. Stay positive and let Advance Scaffolding Limited handle the rest.

Advance Scaffolding Limited is a company that puts safety first! and we comply with all OSHA safety policies and procedures. All contracts are accompanied by Safe Practice Codes, Safety Checklists and many other valuable resources. Fall Protection and Swing Stage Awareness training is available by request.

Part of our safety line includes:

- Permanent Roof Anchor Systems
- Roof Anchor Kits
- Full-body Harnesses
- Lanyards
- Lifelines
- Scaffold Netting
- Universal Guardrail Systems
- Fall Protection Training
- Swing Stage Awareness Training
- Safe Working Procedures Manuals.

INDUSTRIAL SCAFFOLDING

Advance Scaffolding Limited provides work access solutions, including erecting and dismantling scaffolding, scaffolding rental and shoring services, to oil and petrochemical clients, directly and through general contractors.

Our wide client base speaks to our quality, productivity and safety – onshore, offshore. Fast mobilization underpins our operations. With a well-organized, substantial inventory and round-the-clock availability, we can deliver accurate materials and skilled personnel right away.

Advance Scaffolding Limited provides industrial scaffold systems and shoring services for

- Plant maintenance, modifications and upgrades
- Outages, shut-downs and turnarounds
- Protective coatings
- Industrial insulation
- Capital projects

ASL has the largest inventory of cup lock scaffolding in the region stored in 42 000sq ft of warehouse space, and with out fleet of 15 trucks dedicated to transport our materials and team, we have the capability to operate two plant shut downs simultaneously.

Our entire team – from helpers to our most experienced foremen and supervisors – shares a commitment to excellence. We'll help you plan, construct and dismantle the most appropriate cup-lock solution for your project, on time and within your budget, and determine how your requirements are best met. We'll deliver your scaffolding and mobilize labour in as little as a day. Our size, agility and expanding inventory mean we can efficiently complete jobs of any scope. Our Quantify system simplifies rental inventory deployment and lets us share real-time data with you.
